The Genderbread Person
Sex/Assigned Sex

The category of male, female or intersex a person is assigned at birth based on biological characteristics (e.g.: external genitals, chromosomes, hormones etc.)
Gender Identity

A person’s innermost sense of their own gender. This can include man, woman, both, neither or something else entirely. Gender also refers to a variety of social and behavioural characteristics (E.g. appearance, mannerisms). There are lots of words people may use to talk about their gender identity.
Gender expression

The way an individual communicates their gender identity to others. This is done through behaviour, body-language, voice, emphasis or de-emphasis of bodily characteristics, choice of clothing, hairstyle and wearing make-up and/or accessories. The traits and behaviours associated with masculinity and femininity are culturally specific and change over time.
Attraction (Sexual Orientation)

The emotional, romantic and physical attraction to, and intimate and/or sexual relations with, individuals of a particular sex and/or gender.

LICDA. KARLA ISABEL ACUÑA SALAS.

First research developed in our countries.

Identified concerns and needs regarding the healthcare and housing of LGBTI Seniors, and the barriers they face to reach those services.

For that purpose we...

Analyzed the legal framework of elderly adults in those 3 countries.

Interviewed elderly care facilities directors

Interviewed LGBTI Seniors
Myths and stereotypes regarding sexuality
Gap information in elderly housing
Lack of law that protect LGBTI elderly adults rights
Discrimination in health and care facilities

What did we discover?
Common particular challenges for LGBTI Seniors

• “Invisibility” of the LGBTI Seniors and heterosexism.

• Lack of understanding of the LGBTI Seniors specific needs.

• Isolation.

• Insufficient knowledge at senior living facilities and differential treatment (as compared to heterosexual people).

• Lack of legal protection.

U.S LGBT Elders Face Unique Challenges to Successful Aging

1. Cumulative effects of a lifetime discrimination – poverty – health disparities

2. Social isolation & thin support networks

3. Unequal treatment under laws and programs for older adults
In the Future, U.S. Adults Age 65+ Will Be Far More Diverse

Some Takeaways

• Older LGBTQI2S people exist, but are often invisiblized. Because of this, they face additional challenges in comparison to non-LGBTQI2S people and are often overlooked in broad-based population studies.

• There are a lack of equitable laws and policies in place that protect older LGBTQI2S people’s rights and promote their choices and freedom. However, every context looks different.

• As the aging population diversifies, so must the response to their care. Older LGBTQI2S people require policies that are equitable, culturally-appropriate, context-specific and cater to their intersecting needs.
