

ADULT VACCINATION
A Canadian Perspective

BARRIERS TO VACCINATION IN AT-RISK GROUPS

30 April
2019

12:00 PM (Eastern Standard Time)
1:00 PM (Atlantic Standard Time)

Dr. Samir K. Sinha

Peter and Shelagh Godsoe Chair in Geriatrics
Director of Geriatrics, Sinai Health System
and the University Health Network

Adult vaccination is a vital contributor to healthy ageing without which many adults – especially older adults and those with chronic comorbidities – could see marked decline in functioning from vaccine-preventable diseases such as influenza, pneumonia and shingles.

This webinar draws on the knowledge of a leading expert in the fields of geriatrics and health policy to discuss what barriers are preventing ideal adult vaccination coverage.

Dr. Samir Sinha is a passionate and highly regarded expert in the care of older adults. His combined experience as a frontline healthcare worker and expertise in health policy provides a comprehensive understanding on the barriers to improved vaccination rates among older adults.
