

# ADDRESSING BARRIERS TO ADULT VACCINATION

**27** June  
2019

**12:00 PM** (Eastern Standard Time)  
**1:00 PM** (Atlantic Standard Time)

**Dr. Allison McGeer**

Clinician Scientist, Lunenfeld Tanenbaum Research  
Institute of Sinai Health System  
Professor, Dalla Lana School of Public Health  
University of Toronto

Adult vaccination is a vital contributor to healthy ageing without which many adults – especially older adults and those with chronic comorbidities – could see marked decline in functioning from vaccine-preventable diseases such as influenza, pneumonia and shingles.

This webinar draws on the knowledge of a leading expert in the fields of infectious diseases and microbiology to discuss how barriers impacting vaccination coverage can be addressed.

With almost 20 years of experience as the Director of Infection Control for Sinai Health System and research interests in antimicrobial resistance and adult immunization, Dr. Allison McGeer has first-hand experience in the prevention of healthcare associated infection and brings a complete understanding of how to address barriers to vaccination among older adults.
