

Increasing Awareness and Understanding Perspectives of Dementia Caregivers:

National Survey Technical Report

Social Media Toolkit

In recognition of World Alzheimer's Month, the International Federation on Ageing is proud to launch our latest Technical Report, featuring key insights from our national survey on the experiences and perspectives of Canadian caregivers!

Dive into the findings to better understand the vital role caregivers play and the challenges they face in supporting those with Alzheimer's and other dementias. Together, we can create a more supportive environment for all.

#WorldAlzheimersMonth #Caregivers #Ageing #DementiaAwareness

Did you know that 6 in 10 caregivers for a person with dementia are often the only person available to provide care?

Findings from the International Federation on Ageing's Technical Report highlight the immense responsibility and isolation experienced by Canadian caregivers.

Join IFA this World Alzheimer's Month by checking out the Technical Report and raising awareness and advocating for stronger support systems for Canadians!

Every September, World Alzheimer's Month aims to raise awareness about Alzheimer's disease and other forms of dementia, reduce stigma, and advocate for better understanding, support, and care for those affected by these conditions. The month-long campaign encourages global conversations around the challenges of living with dementia, the importance of early diagnosis, and the need for research, treatment, and support for individuals living with dementia and their caregivers.

Check out the International Federation on Ageing's newest report Increasing Awareness and Understanding Perspectives of Dementia Caregivers to hear the voices and experiences of Canadians who provide care for a person living with dementia!

Caregivers are crucial members of a care team. This World Alzheimer's Month, IFA is proud to contribute by focusing attention on the perspectives of caregivers for people living with dementia.
